

INSPECTION SERVICES

Performance You Can Trust.

Our comprehensive inspection services provide independent testing and verification to ensure homes and buildings achieve optimal performance, energy efficiency, and code compliance throughout construction.

OUR INSPECTION SERVICES

Code Compliance

Ensures projects comply with all local, state, and national building codes through expert review and guidance.

HERS Inspection

RESNET-certified inspections that verify a home's energy efficiency and compliance with performance standards.

HVAC Grading

Performance testing of HVAC systems, including airflow, duct leakage, and equipment installation to ensure efficiency and comfort.

Radon Testing

Indoor air quality testing that measures radon levels to identify potential health risks and support mitigation efforts.

Test and Balance

Airflow measurement and system adjustments that optimize HVAC performance, comfort, and energy efficiency.

Terminal Envelope Imaging

Infrared imaging that identifies air leakage, missing insulation, and thermal bridges to improve building performance.
